TODAY'S TOOLBOX

Provide a summary of the below toolbox topics during your toolbox talk.

Eyes and Mind on Task

With vacation plans, COVID-19 restrictions and work coming to an end in most areas it is important for us to maintain focus and keep our eyes and mind on the task at hand.

Eyes on Task:

- Keep your eyes on the task you are doing.
- Watch what you are doing—read instructions, labels, procedures.
- Use your peripheral vision—Keep your primary focus on the task and be aware and alert.
- Take micro breaks to step away from your work to observe your surroundings.

Mind on Task:

- Keep your mind focused on the task—Know the steps you need to take to complete your task.
- Don't get distracted by adjacent work, however be aware of your surroundings.
- Pay attention to the work you are doing, rather than just going through the motions. Especially for repetitive work.
- Understand your bodies capabilities and do not exceed them.

Your eyes and mind can work together to keep you safe!

Be accountable : Choose safety—work safe—and go home injury free!
