

FAREWELL

During a Turnaround Event our first priority as a team is ensure everyone is working safely. While we have faced a number of challenges, and workers were hurt, we have seen a tremendous improvement in VOICE participation from our workforce this year. With an astounding 29 800 voice cards (and still counting) workers made peer to peer interventions, voiced safety concerns, and commended their co-workers. The improvement in communication this year is something we can all be proud of.

On behalf of our Project Olympus Management Team thank-you for your commitment to working safely and your dedication to getting the job done. An outage of this size requires thousands of people, working together as a team to make it successful and your hard work has not gone unnoticed.

Have a wonderful, safe summer, and thank-you for your contribution to Project Olympus.
