

## **Edmonton Exchanger & Refinery Services Ltd.**

Edmonton Exchanger provides on-site plant maintenance and construction services for the petrochemical industry, refineries and fertilizer plants. Our on-site services range from specialized field machining and controlled bolting, to complete turn-key plan and refinery shutdown projects. In the case of emergency plant maintenance requirements, we are capable of mobilizing a 1,500 person work force within a very short time frame.

Our field operations are supported by a vast network of support services that range from project planning and management, to steel fabrication, large-scale machining and heat exchanger fabrication and repair services. Edmonton Exchanger's steel fabrication facilities feature the most extensive one-stop pressure vessel head forming and shell rolling capabilities in North America, and stock one of the largest inventories of pressure vessel quality steel plate in the world.

Through our leading-edge "Nobody Gets Hurt" safety program, Edmonton Exchanger is committed to sending our employees home to their family and friends, safe and healthy each day. Our exemplary health and safety management practices have earned Edmonton Exchanger the provincial Occupational Health and Safety Council's 2010 Health and Safety Leader Award.

### **Field Services and Capabilities**

- Turn-key Shutdown Projects
- General Shutdown Services
- Heavy Lift Execution
- On-site Heat Exchanger Services
- Crane and Equipment Rentals
- Piping Projects

### **Specialized Field Services**

- Controlled Bolting
- Flange Facing
- Cold Cutting
- Specialized Welding

### **Field Support Services**

- Project Management
- Estimating
- Safety Management
- Procurement
- Subcontract Coordination
- Quality Control

- Engineering
- Planning / Scheduling
- Steel Fabrication Plant Support
- Steel Plate Services
- Large Scale Machining
- Heat Exchanger Services
