

United Association of Plumbers & Pipefitters, Local 488

We are Canada's largest pipe trades union local.

UA Local 488's 10,000 members supply their skills to our construction industry partners in Edmonton and throughout Northern Alberta.

Because our region's industrial construction industry is the world's most active – more than \$100 billion worth of oil sands and other projects are underway or planned – we supply more pipe trades work than any other union local in North America.

If you're a pipe tradesperson, if you want to become one, or if you want a reliable supply of skilled Journeymen and Apprentices for your business, please have a look around this website.

Chances are you'll find what you're looking for.
